

Dream Greener 2024 Program Guide

March	April	May	June	July	August	September	October	November	December
	Round 1	Round 2		Round 3		Round 4		Round 5	Round 6
	Fert. Pre-m Pre-emergent will control crabgrass after germination but before it reaches the soil surface.	Fert. - Pre-m/Post-m - Escalade Post-emergent will be used toward the end of Round 2 along with Escalade for broadleaf weed such as Dandelions, clover, ect.		Fert. - Solitaire - Merit Solitaire will control broadleaf weeds and crabgrass as well as nutsedge in the early stages. Merit is a grub preventative that will control grubs prior to lawn damage.		Fert. - Q4 - Merit Q-4 is an aggressive crabgrass control that will also control broadleaf weeds and nutsedge.		Fert. - Escalade - Dismiss Escalade will clean up lingering broadleaf weeds. Dismiss will control late nutsedge.	Fert./ or Lime combo Lime will neutralize acidic soil and create a better growing environment for the lawn.
Veg Pre-M		Veg 1	Veg 2	Veg 3	Veg 4	Veg 5	Veg 6		
		Flea/tick 1	Flea/tick 2	Flea/tick 3	Flea/tick 4	Flea/tick 5	Flea/tick 6		
Round 1	Round 2	Round 3	Round 4		Round 5	Round 6	Round 7		Round 8
Dormant Oil Dormant oil controls pest by smothering egg stages before hatching.	Fertilizer A balanced fertilizer is injected below the mulch and soil surface. This allows nutrients to be readily available as needed by plants.	Talstar - Abamectin - Eagle This is the first insect and disease (I&D) control visit. This will control caterpillar stages of pests as well as aphids, apple scap on crabapples, and many other insects and diseases.	Talstar - Safari- Eagle The second I&D will control the beginning stages of Lanternfly, as well as other mid summer pests including Japanese beetles emerging around July 4.		Talstar - Safari The 3, and last, I&D of the year will continue to reduce Lanternfly populations as well as late season pest including fall web worm, lace bugs, and many others.	Fertilizer A balanced fertilizer is injected below the mulch and soil surface. This allows nutrients to be readily available as needed by plants.	Dormant Oil Dormant oil controls pests by smothering egg stages before hatching.		Anti-Desiccant This is a pinesin based product used to seal moisture in leaves reducing the possibility of winter browning and drying.
